

CRG CORE FACILITIES PROJECT MANAGER

Ref. CF-PM-160112

The Institute:

The Centre for Genomic Regulation (CRG) is an innovative centre created in December 2000 and located in the Barcelona Biomedical Research Park (PRBB). The mission of the CRG is to promote excellent basic research in biomedicine, cutting-edge technology development and high quality training of the next generation of scientists. CRG has a highly international culture and the working language is English.

Scientific areas include Gene Regulation, Differentiation and Cancer, Cell and Developmental Biology, Systems Biology, Bioinformatics and Genomics, Genes and Disease.

Research at the CRG/PRBB is supported by state-of-the-art core facilities (www.crg.eu/core_facilities) including genomics, proteomics, bioinformatics, advanced light microscopy, biomolecular screening and protein production, FACS and a modern animal house. The Core Facilities constitute the centralized scientific research infrastructure at CRG. They are a meeting point for scientists from different institutes and disciplines, to foster exchange and integration of expertise, and to create and conduct interdisciplinary projects.

For more information visit our website <http://www.crg.es>

Post Description:

The Core Facilities Project Manager will support the Head of Core Facilities in different activities, including the identification of technology needs, the initiation and management of collaborations with industry, internal and external dissemination activities (newsletter, website, organization of site visits, etc.), the organization and execution of networking events, the acquisition of external funding, and the coordination of the granted research projects with core facilities participation.

The successful candidate will work closely together with the Head of Core Facilities, the different Core Facility Unit Heads, and the Centre's administration.

Candidate requirements:

- **Experience:** The preferred candidate holds a PhD degree in natural sciences and has proven skills in scientific coordination and writing. Previous national and/or international experience in science management and dissemination is advantageous.
- **Languages:** Professional communication skills in English are required. Knowledge of Spanish and/or Catalan is an asset.
- **Personality:** The ideal candidate is proactive, responsible, highly organized, works independently, and enjoys operating in an international and highly interactive environment. Excellent communication skills, an open personality, and the capability to easily interact with people of different scientific backgrounds, nationalities and characters, are essential requirements for this post.

Work Conditions:

- **Type of contract:** CRG funded.
- **Estimated annual gross salary:** According to profile and experience
- **Starting date:** Immediately

Application procedure

Candidates should send their application, including a cover letter addressed to Dr. Doris Meder, their CV and the contact details of at least 3 potential referees, to rrhh@crg.eu, **indicating the reference in the subject line.**

Applications Deadline: February 15th, 2012.
