

Radioactive facility (IR-PCB)

300m² of authorised exclusive laboratories, 190m² of shared-use laboratories with two well-equipped central radioisotope laboratories.

FACILITIES:

- > Cell culture area
- > Animal testing area
- > Counter room
- > Waste storage
- > Peripheral laboratories
- > X-ray diffraction room

EQUIPMENT:

- > 2 Molecular Dynamics Typhoon 8600 Phosphorimager
- > 1 Amersham Typhoon IP
- > 3 Packard Tri-Carb 2900TR beta counters
- > 1 Packard Cobra II gamma counters
- > 1 Hidex AMG gamma counter
- > 2 Packard TopCount microplate beta counters
- > 1 Yxlon Intl. Smart X-ray irradiator
- > 1 Waters HPLC

The IR-PCB is also fitted out with: centrifuges, electrophoresis cuvettes and power supply, refrigerators and freezers, dryers and lyophilisers, shakers, thermocyclers, portable surface contamination monitors and portable Geiger monitors.
