ProteoDesign, a biotech company based in the Barcelona Science Park (Barcelona, Spain), developing novel immuno therapies to treat cancer, is looking for highly motivated protein chemist to join our R&D team.

Job duties will be focused on designing and carrying out research on the synthesis and characterization of protein bioconjugates.

Candidates will join as Senior Researchers and report to the Chief Technology Officer.

Requirements

**Academic:**
PhD in Chemistry, Biology or Biochemistry.
Bachelor’s Degree in Chemistry or Biochemistry.

**Experience:**
Relevant laboratory experience (> 2 years) in chemical synthesis, purification and analysis of amino acids, peptides, oligonucleotides and protein conjugates.
Relevant experience (> 2 years) in the characterization of proteins and protein conjugates.
Relevant experience (> 2 years) in the expression and purification of recombinant proteins.

**Technical skills**
Analytical characterization of peptides, proteins and oligonucleotides (HPLC, MS, SDS-PAGE).
Training on peptide/protein chemistry.
Experience in molecular biology, recombinant protein expression and purification.

**Language skills**
English written and spoken.

**Other skills**
Independent.
Highly motivated and pro-active.
Rigorous, meticulous, attention to detail.

**What do we offer:**
Incorporation in a highly stimulating, young and dynamic organization.
Long-term incorporation in our team.
Competitive salary.
Immediate incorporation.

**How to apply:** Please send your CV (including references) and a presentation letter to: info@proteodesign.es.
