

Special Reaction Services (SRE-PCB)

65m² of laboratories equipped for performing special reactions

FACILITIES:

Toxic products and dangerous reaction laboratory

- Fume hoods
- Rotary evaporator with vacuum pump
- Refrigerator
- Vacuum oven

High-and low-pressure hydrogenation laboratory

- Hydrogen line up to 5 bars
- High-pressure hydrogen line up to 50 bars
- Hydrogen detector
- Miniclave Autoclave
- Miniclave Drive Autoclave
- Autoclave Bep 280

Hydrogenation laboratory for processes up to 100 bars

- Hydrogen line up to 5 bars
- High-pressure hydrogen line up to 100 bars
- Hydrogen detector

Clúster building: Top floor: C4
